

# SELVAPANDI

Web Developer & Software Trainer

## Dear Hiring Manager,

I am writing to express my interest in the Website Coordinator position at GoTeam. With over a year of experience in freelance web development and software training, I bring a mix of technical expertise and project coordination skills that make me a strong fit for this role.

I specialize in building high-performance websites using the MERN Stack and WordPress, with a focus on speed, user experience, and scalability. My recent projects include my portfolio site (selvapandi.com), an aviation e-learning platform (pilotHorizons.xyz), and a full-featured e-commerce site (AquaShop) built using the MERN stack. I've also worked closely with clients to manage timelines, feedback, and revisions, which has given me a deep understanding of website operations from both a development and user perspective.

In addition to development, I currently serve as a Software Trainer, where I mentor students in HTML, CSS, JavaScript, Tailwind CSS, and full-stack development. This experience has sharpened my ability to communicate technical concepts, manage tasks, and provide guidance — all essential traits for a coordinator role.

I am open to remote or on-site roles and am ready to contribute my creativity, technical skills, and collaborative mindset to your team. I would love the opportunity to bring my experience to GoTeam and help deliver engaging and optimized web experiences.

Thank you for your time and consideration. I look forward to the possibility of contributing to your organization.

Warm regards,

*Selvapandi*

## ABOUT ME

I am a Web Developer and Software Trainer with experience in freelance, remote, and mentorship-based roles. I specialize in building responsive and optimized websites using the MERN Stack, Tailwind CSS, WordPress, and other modern web development tools.

## EXPERIENCE

### Software Trainer (Frontend & Full Stack)

*PrabaZone – Internship | March 2025 – Present*

- Trained 3+ students in web development:
- One in full-stack MERN (MongoDB, Express, React, Node)
- Others in HTML, CSS, JavaScript, and Photoshop basics
- Mentored students with real-time project work and doubt clarification
- Conducted one-on-one sessions and provided task-based learning
- Coordinated learning materials and guided beginner developers
- Acted as a supportive mentor and technical trainer during the internship period

### Freelance Web Developer

*Self-Employed | April 2024 – Present*

- Developed responsive websites using HTML, CSS, JS, and React
- Built complete e-commerce project using MERN stack (AquaShop)
- Managed client communications, revisions, and feedback
- Used Git, GitHub for version control and Firebase for small projects
- Designed UIs with tools like Figma, Canva, and Photoshop

## PROJECTS

### [selvapandi.com](https://selvapandi.com)

*Portfolio Website (ReactJS) - [GitHub](#)*

- Developed and maintained a personal portfolio website showcasing projects and skills
- Implemented a project gallery to display web development expertise
- Optimized website performance for faster load times and SEO ranking
- My Projects Work, clients, Testimonials, Skills, Framer Motion designed.

### [pilothonorizons.xyz](https://pilothonorizons.xyz)

*Aviation Education Platform (WordPress)*

- Built an educational website for a school student client within 12 hours, ensuring a structured and resourceful learning experience
- Designed a structured, easy-to-navigate platform with aviation training materials.

### [AquariumShop](#)

*E-commerce Platform (MERN Stack) - [GitHub](#)*

- Developed a fish buy & sell marketplace using MERN stack
- Integrated Postman API for seamless transactions and optimized user authentication
- Improved database efficiency: Reduced MongoDB query response time to under 10ms
- Optimized backend: Achieved Node.js API response time under 50ms
